(a) Total number of wage or salary earners in employment excluding employees in the defence forces at home or abroad and Government "relief" workers. Figures for June, 1933, July, 1939, and June, 1943, were obtained from the Census, National Register and Civilian Register respectively.

(b) Average earnings per employed male unit. Male units represent total male employment plus a proportion of female employment based on the approximate rates of female to male earnings. Seasonally adjusted.

(c) All building operations for which permits granted by Local Government Authorities. Excludes Government buildings (see footnote, page 27).

(d) Including owner-built houses. Quarterly averages for years, and quarterly totals.

(e) June, 1933.

(f) July, 1939.

(g) Affected by industrial disputes.

(a) Estimates based on Pay-roll Tax returns. Excludes National Service trainees in camp. Figures from June, 1945, subject to revision.  
 (b) Includes Northern Territory and Australian Capital Territory.

## AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS.

The following figures are derived from employment and wages recorded on Pay-Roll Tax returns (which cover approximately 80 per cent. of total employment) and from estimates of the unrecorded balance. Pay of members of the armed forces is not included. The figures are not seasonally adjusted. A seasonally adjusted monthly index of average weekly wage earnings is published on page 2.

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Total wages as above divided by total civil employment expressed in male units. Male units equals the number of males plus a proportion of females based on the approximate ratio of female to male earnings. The same ratio has been used in each State and because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above. The break in continuity in the State figures is indicated because the basic wage changes over the period may have affected the individual States differently from the Australian average on which the ratio is estimated.

NOTE.—Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

## TRADE UNION UNEMPLOYMENT RETURNS.

The only records of unemployment available continuously over a long period of years at short intervals are the quarterly percentages reported by trade unions to the Commonwealth Statistician. The membership of the reporting unions consists predominantly of males, and represents at present about 55 per cent. of the total trade union membership and between 25 and 30 per cent. of all wage and salary earners. For some States and some industries the returns are more representative than for others. This table, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States or industrial groups. It is an indication of trend of unemployment as estimated or recorded by secretaries of those trade unions which supply returns. Returns are not collected from unions whose members are predominantly in permanent employment (Governmental, &c.) or casual employment (wharf labourers, &c.). The percentages relate to unemployment due to all causes except unemployment of those directly involved in industrial disputes.

# EXPORT PRICE INDEXES.

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. For some metals and for wheat (since July, 1945) the index of prices is deduced from average value of current sales or shipments and hence shows some irregularity.

## SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the prices of the commodities are multiplied by the average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36.

(Base of each Section: Average 3 years ended June, 1939 = 100.)

## EXPORT PRICE INDEXES—continued.

### RECENT TRENDS—EXPORT PRICE INDEX—WOOL AND "OTHER GROUPS".

Reference to the group indexes in the table on page 18 hereof will show the great increases and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards occurred in the price of wool during the twelve months ended June, 1951. Similar, but less marked, movements have occurred in prices of metals and hides. Since wool is a predominant export (with 46 per cent. of the Base Aggregate of the index) fluctuations in wool prices obscure the movements affecting the other components in the All Groups index. For purposes of comparison they are shown separately below.

(Base of each Section : Average 3 years ended June, 1939 = 100.)

### MONTH-TO-MONTH INDEX : CHANGING WEIGHTS.

The index-numbers in the two preceding tables, while they indicate satisfactorily the general trend of the market, take no account of the relative quantities actually sold at the different prices ruling during each month. In consequence the index-numbers do not give an adequate indication of the significance of the price movements as they actually affected current sales. This is shown more accurately by the index-numbers (including gold) in the following table, in the computation of which the "quantity-multipliers" are changed each month. The index-numbers are designed solely for comparisons of current prices with those of the corresponding months, or periods of months, of the preceding year.

(Base : Weighted average price level in corresponding months of preceding year = 100.)

Month.	Month stated compared with same month of preceding year.						Period of trade year ending in month stated compared with same period of preceding year.

# WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(a) Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally. (b) This computation includes the price of raw wool for local manufacture. For computation using auction room price of wool see note (b) at foot of following page.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Legislation which became effective on 14th December, 1950, had the effect of reducing (by bounty) the price paid for raw wool for local manufacture in Australia below the open market (auction room) price. Such reductions were virtually retrospective to August, 1950, and continued until 30th June, 1951. The effective prices paid for raw wool for local manufacture (i.e., auction room price less bounty) have been used in calculating the index published on page 20 hereof. Below are shown these same indexes calculated on the auction-room prices for wool. Only the four columns shown below are affected.

# PRIMARY PRODUCTION PRICE INDEXES.

The annual index-numbers in the following table have been recomputed to the base average 3 years ended June, 1939 = 100 from the revised series published in *Primary Industries Bulletin*. They are based in general on prices realized in the principal markets of Australia.

The monthly index-numbers (based on the nearest equivalent wholesale price quotations) are intended progressively to forecast the point which the annual index-numbers will eventually reach, and so provide a preliminary figure for the latest full year pending the completion of the annual census of production. The preliminary index-numbers will be revised as each production census is completed.

(Base : Average 3 years ended June, 1939 = 100.)

# SECURITY PRICE INDEXES.

In comparing movements in the two sets of index-numbers on this page, attention should be paid to differences in the methods by which they have been constructed, and in the nature of the companies and the types of shares included in each index. These are outlined in the footnotes to the table.

(a) Compiled by the New South Wales Government Statistician. The index-numbers are based on the prices of the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. They represent unweighted averages of the mean monthly prices per £1 of paid-up capital. Adjustments are made where capital is written off or bonus shares issued. Recomputed from original base, par values.

(b) Compiled by the Queensland Bureau of Industry. The index-numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index-numbers represent unweighted averages. Mean monthly values are used. Recomputed from original base, April, 1928.

(c) These shares relate to leading companies and do not include bank shares or mining shares.

NOTE.—The National Security (Building Control) Regulations, which operated from 5th December, 1940, placed the granting of building permits for new buildings or alterations costing more than £5,000 under the control of the Commonwealth Treasurer. Various amending regulations made the control more stringent. On 19th June, 1942, the control passed to the Department for War Organization of Industry, after which date only alterations costing less than £25 could be made without consent. From 31st August, 1945, when control passed to the Department of Works and Housing, consent was not necessary for the erection of a dwelling house costing less than £1,200 or for repairs and alterations to a residential building costing less than £150 in any financial year. As from 1st November, 1945, the Commonwealth Government relinquished control over building permits and delegated its powers under National Security Regulations to the States until State legislation was introduced. In Tasmania control over building permits was discontinued from 31st December, 1946. In other States, control over building permits has, by stages, been considerably relaxed and, in most States, is now virtually discontinued. The "value of permits" shown above relates to the value of building permits issued by local government authorities and not to approvals granted under the Regulations.

# GOVERNMENT RAILWAYS : FREIGHT, PASSENGERS AND REVENUE.

The following table shows statistics of freight and passengers carried and of revenue earned on the five Mainland State Railways to the end of June, 1947. From July, 1947, particulars relate to all State and Commonwealth Railway Systems.

The daily average number of passenger-journeys is obtained by dividing the monthly totals by the *total* number of days in the month.

**WHOLESALE TRADE.**

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. The returns do not relate to all wholesale trade, and exclude sales of vendors trading only in exempt goods. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degree. Insufficient information is available to enable adjustments to be made to the crude figures on this account. Monthly totals are compiled on a basis comparable with the monthly averages for preceding years.

(a) Averages of liabilities and assets on Mondays of period until December, 1946; thereafter averages of liabilities and assets on Wednesdays.

(b) Ten months ended June, 1946.

(c) Between March and July, 1952, certain loans to building societies and credit foncier loans for housing were transferred from the General Banking Division to the Commonwealth Savings Bank in exchange for Government Securities. The reduction in these loans (held by the General Banking Division) over this period was approximately £24,000,000.

(d) At the beginning of July the General Banking Division opened, in the books of the Central Bank, a deposit account with a balance approximating the amount that would be required if it were subject to Special Account provisions of the *Banking Act 1945*. This represents a change in the form of liquid assets which were previously held, predominantly in Treasury Bills.

NOTE.—From October, 1948 to July, 1952, liabilities and assets of the Commonwealth Bank related to the combined business of the General Banking Division and the Rural Credits, Mortgage Bank and Industrial Finance Departments. In the table above only the General Banking Division is represented and the figures for earlier periods on this and page 50 have been revised to exclude the Rural Credits, Mortgage Bank and Industrial Finance Departments.

(a) Weighted averages for last Wednesday in month. Calculated, when loans above par, on earliest date of maturity.  
 (b) Average rate on mortgages registered in three months ending with month shown. (c) Rate for securities maturing in 2 and 12 years, estimated from rates on securities maturing in 0-5, and 10 or more years, respectively. Figures relate to last Wednesday in month.  
 (d) From December, 1945 to July, 1952, 1.50% on first £10,000 of deposit; 1.00% on amounts in excess. (e) The Order made by the Commonwealth Bank under the National Security (Economic Organization) Regulations fixing maximum rates of interest has been revoked. Trading banks have been asked, and have agreed, not to pay, on fixed deposits, rates higher than the following:—3 months, 1%; 6 months, 1.25%; 12 months, 1.50% and 24 months 1.75% (up to £10,000), and 1.50% (over £10,000), as from the 1st August, 1952. The Commonwealth Savings Bank has made an all-round increase of  $\frac{1}{4}$ % in the present rates of interest on deposits and, as from 1st August, 1952, is allowing 2 $\frac{1}{4}$ % per annum up to £500 and 1 $\frac{1}{4}$ % per annum from £501 to £1,000.
